

## **Lake Meeting Minutes Thursday's 8/6/2020/ Lake Zoom meeting:**

### **Lake quality**

Water is clear with almost 8' secchi depth. Spot treating of Brittle Niad continues.

### **Dam update**

Damn inspection occurred on 7/28/20. Committee chair and OIC were present and discussed the conditions and inspection with Chris Adams of GZA Environmental. Dam is in good condition. Chris will provide a full inspection report and OEM manual

### **Swim Area/ Restrictions Discussion**

Discussion: swimming 15ft from boats 25 ft from shoreline

3 strikes out? Fine community hard labor?? My favorite :) possible penalties

many qs remain many issues - who polices? how to defend distance etc? Subjective causes ill will etc possible flag usage for safety

Resident Weed complaint:

Jeff & Karen "spirited" they spoke about weeds troublesome to many too high suggested weed removal harvesting etc. - some pushback some members explained to them - Joanne followed up etc. This is an example of much to know about the lake, few really know our true lake situation - tabled?? (to be called vegetation going forward) Sol & Princ like that verbiage as we sound smarter to them we speak that way.

### **2021 budget**

fish - including trout & minnows \$9000?

Traditional Trout stocking for opening day line#521.03

Minnow stocking 522.17 \$3000.00

Second stocking Hybrid Stripers, Walleye, Channel Cats, Perch and crappie from the remaining money from line 521.03

Line 521.03 is \$6000.00

Line 522.17 is \$3000.00 (must be confirmed)

All fish stocked have previously been in our lake.

I can't give individual prices or numbers since I'm sure prices and availability will change from this year.

I know this is a bad time but our budget numbers haven't increased in 10-15 years, while prices and shipping continue to rise. Any increase would help.

### **Adding Water Boat Docks & Land Racks**

1st annual meeting - put together total for POA approval for (2) used water dock sections appx \$3400 +

(2) new finger 2' x 6' appx \$1300 ? unsure ? (same as last year)

Price land rack stick built or other at Sub Meet Wed 8/12 - (estimates to follow)

last area optimization at Beach 2 F docks can still be done to add multi Use spaces (Ed Clark)

wasted dock space right side of Beach 2 pontoon/sail dock

wasted dock space at temp boat spaces clubhouse dock B

**Water/ land space improvements sub committee meeting Wed 8/12 7pm for ideas to add water/land racks - space research**

### **Dock stability issues**

implement all known dock support ideas to all areas of docks to prevent damage

possibly incorporate 2'x6' dock fingers to future dock sections purchased for stability

Ed Clark
